Citibike Trip Analysis

Explore the extensive examination of Citibike trips in the year 2021, focusing on insightful details about user type, bike station locations, and the geographical spread of stations. Dive into the interactive dashboard for an enriched understanding of the 2021 data.

User Analysis

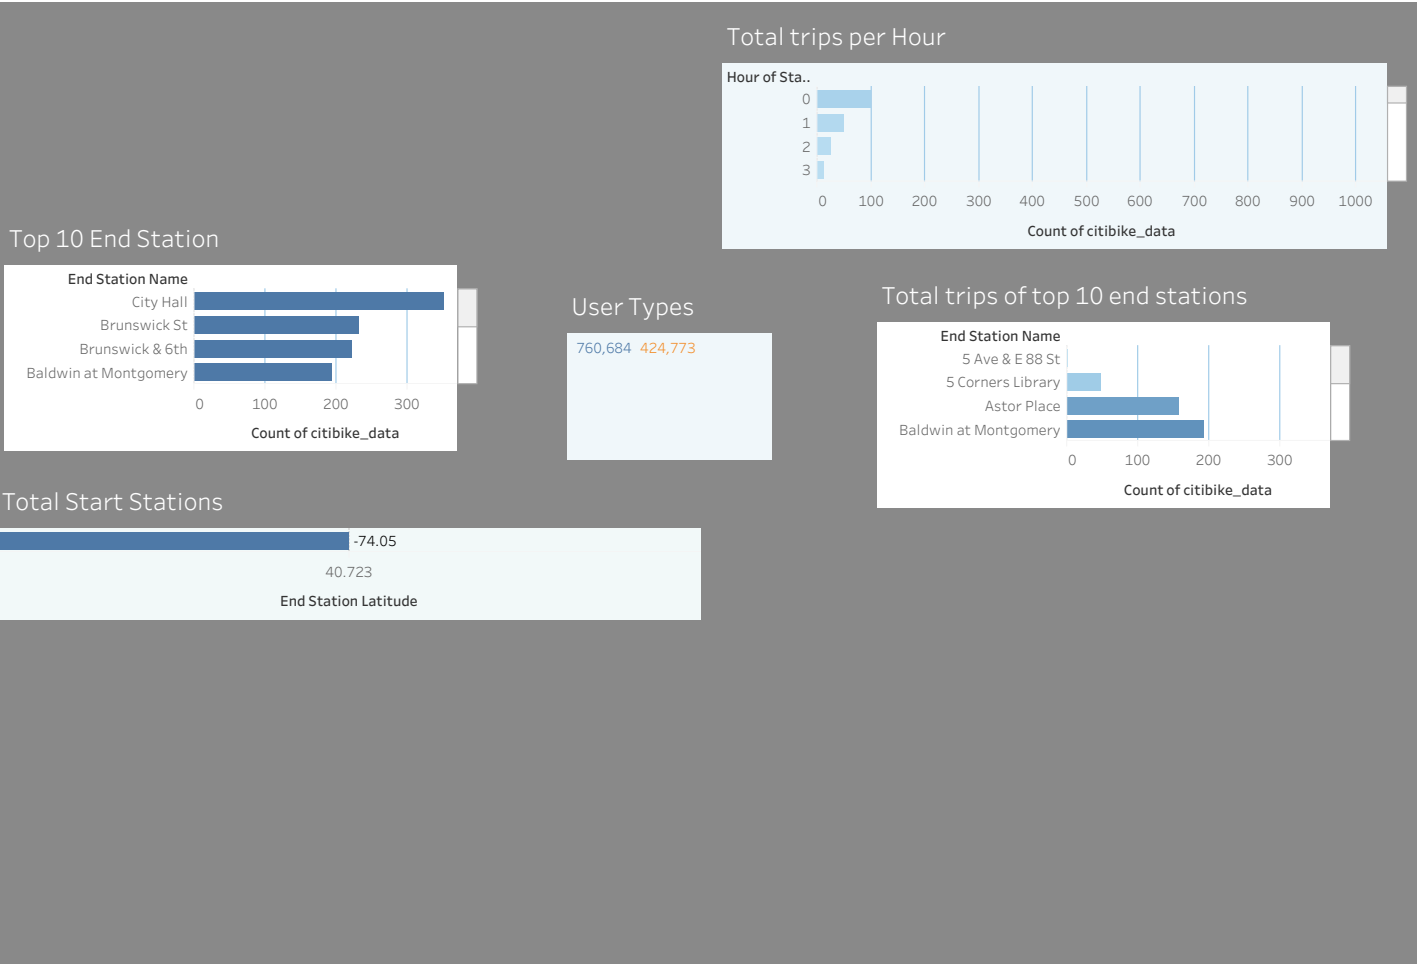

This segment offers an exhaustive evaluation of the Citi Bike trips, considering a range of elements including user type, gender distribution, and age groups. Furthermore, it delivers a thorough exploration of trip patterns concerning the time of day and day of the week, along with the aggregate count of trips per month.

Station Analysis

"This segment concentrates on examining trips in association with the bike stations. It contrasts the trip trends between weekdays and weekends and furnishes details on the mean trip duration for each month."

Geographic Analysis

The geographic analysis section was relatively limited due to the scarcity of available data. However, the mapped data provided an effective visualization, showcasing the concentrated bike station locations and their corresponding trip patterns across specific regions. This approach facilitated a concise yet insightful overview of the geographic distribution of the Citi Bike system.
